On behalf of Montana HOSA-Future Health Professionals, I would like to recognize and thank you for your contribution as an educational partner with one of our local chapters.

Montana HOSA is one of seven Montana Career and Technical Organizations (CTSOs) partially funded through House Bill 86 which provides a unique program of leadership development, motivation, and recognition exclusively for middle, secondary, and collegiate students who have an interest in pursuing careers in the health professions. Many of these students are also enrolled in co-curricular health science education or biomedical science programs in their schools. As the only student organization that is 100% healthcare, HOSA allows students to make informed career decisions and realistic career goals flexible to the ever changing nature of the medical industry.

The mission of HOSA is to empower our members to become leaders in the global health community through education, collaboration, and experience. To do this we rely greatly on partnerships to help develop and mentor our students in this educational pathway. We could not be more grateful for your support in donating your time to serve our students. If you would like to learn more about Montana HOSA or ways you and/or your organization can get more involved please check out our website at <https://montanahosa.org/about/get-involved>

Once again, on behalf of Montana HOSA, I thank you for your partnership and support.

Sincerely,

Katie Meier
Montana State HOSA Director

This letter recognizes that _____ contributed _____ hours of time presenting or working with students with local HOSA chapter _____ on _____ (date).

Signature of local HOSA Advisor: _____
